Healthy Home preformed a water test for FHA/VA loan. Sally was incredibly easy to work with and full of information which helped us get through the test. I would highly recommend healthy Home and Sally for anyone needing services done by her company. July 2022

They were awesome with scheduling in our timeframe. If you need any well testing they do it all. We needed it for VA LOAN and they covered all the tests needed. Thanks again

This company is LEGITIMATE! We have used them several times and they have always been accurate.

We have used them to inspect several homes that we were thinking of purchasing and they have found mold for us that had either been hidden by the owners or that they owners did not know that they had.

They do a great job letting you know if the mold issue is worth worrying about. They don't use scare tactics and really know what they are doing.

We highly recommend using them.

Required by the VA we scheduled a well inspection for a home we were considering and I am forever grateful we went with Health Home and even more grateful for Sally! She was amazing to work with; she was our advocate, she was informative and most importantly she went above and beyond to ensure we were taken care of!

She was an amazing resource throughout this process and I would trust no one else to care for you like she has. She treated us like family and that was appreciated throughout a process as stressful as home buying.

Thank you Healthy Home and Sally! We are forever a loyal customer and will make sure our friends and family know this is the only place to trust!

Family owned and operated business with wife in the office and husband in the field. From the moment I called Sally was able to quickly diffuse my worries and concerns about finding mold in our home. She was excellent in thoroughly describing the process and answering my many questions. Her husband, Dana who came out to our home arrived on time and spent additional time explaining what he would be doing and how it was done. They were very quick to respond to our needs and we had a very thorough and impressive inspection report in a timely manner. Our mold problem was a result of a long time roof leak that we were unaware of until water started trickling in, but by then the damage had already been done behind the wall and the crown molding where you would least expect. I would highly recommend this business without any hesitation!!

I've done quite extensive research on mold inspection companies in the Hunters Creek, Kissimmee, FL area. I've found that Healthy Home Environmental Services provides reliable, expert mold testing & water testing services at reasonable rates. In fact, better than most. Looks like this is the ideal company for me to hire to inspect for mold in my home. Thumbs up!

Can I just say that Sally and Mike are the BEST! They are very communicative, and they were able to get our testing done very quickly. When Mike comes out, he is super professional and nice. Sally was always so helpful on the phone and shared a lot of great information.
